self testing is a self care intervention recommended by who as

an additional testing strategy for hiv hepatitis c and syphilis respectively this approach recognizes the central and active role that people play in managing their own health care and is increasingly becoming important as an additional strategy in expanding access to and utilization of health services across various disease areas and conditions the purpose of this toolkit which follows a modular framework is to provide a package of practical guidance tools and resources to support countries in the design implementation and scale up of hiv hepatitis c and syphilis self testing which can be adapted to their epidemiological context covering both health and community systems module 1 provides an overview of the self testing concept and who recommendations on hiv hepatitis c and syphilis self testing module 2 covers steps for the preparation and planning including guidance on the introduction and implementation of self testing how to conduct a country situational analysis and access to quality assured products module 3 guides the product selection registration procurement and supply chain management processes to ensure the smooth flow of quality assured products from manufacturers to intended users module 4 focuses more broadly on implementation and scale up of self testing across the three diseases module 5 covers key resources related to monitoring and evaluation for self testing programmes

learn the lab testing skills you need to know laboratory and diagnostic testing in ambulatory care a guide for health care professionals 3rd edition provides in depth coverage of the most common procedures and techniques of all the new clia waived point of care tests along with some moderately complex tests clear step by step instructions and full color photographs make it easy to perform each test and procedure to reflect the expanding roles of medical assistants and medical lab technicians this edition adds a new chapter on electrocardiography and spirometry written by noted medical assisting educator marti garrels this guide also includes an evolve companion website with videos structured lab notes and activities for extra practice with clinical laboratory skills comprehensive coverage of the most common clia waived tests prepares healthcare professionals for lab testing in the ambulatory setting a triad organization gives chapters a consistent easy to follow format with 1 fundamental concepts 2 step by step instructions for clia waived procedures and 3 advanced concepts that lead to a higher level of critical thinking and decision making a full color atlas section shows common laboratory and diagnostic findings including depictions of cells casts and crystals learning objectives begin each chapter with goals for what you should accomplish serve as checkpoints for comprehension and skills mastery and provide a study tool in preparation for examinations procedure boxes provide step by step instructions and full color photos and

illustrations for today's commonly requested CLIA waived lab tests. Key terms are listed and defined at the beginning of each chapter as well as included in the book's glossary. Common abbreviations and acronyms associated with CLIA waived testing are listed and defined at the beginning of each chapter. Review questions at the end of each chapter ask you to recall and assimilate the information you've learned. A workbook matches the chapters in the textbook, offering activities and exercises to reinforce laboratory concepts, terminology, and procedures. Sold separately, expert author Marti Garrels brings years of on-the-job experience, an advanced MSA degree, dual degrees in medical technology and medical assisting, and classroom experience as an instructor and as a medical assisting program director. References at the end of each chapter cite related websites for further reading and research. An Evolve companion website includes various activities and exercises to enhance learning with problem-solving scenarios, new illustrations, and photographs showcasing new technology and the performance of lab testing tasks. New electrocardiography and spirometry chapter focuses on the role of the medical assistant and the lab technician in these diagnostic tests. New content updates the text with a focus on new technology and significant advances made in recent years, including the latest CLIA waived test methods.

AAP Prose Award Finalist 2018-19, *Management of Animal Care and Use Programs in Research, Education, and Testing*, Second Edition, is the extensively expanded revision of the popular *Management of Laboratory Animal Care and Use Programs* book published earlier this century. Following in the footsteps of the first edition, this revision serves as a first-line management resource providing for strong advocacy for advancing quality animal welfare and science worldwide and continues as a valuable seminal reference for those engaged in all types of programs involving animal care and use. The new edition has more than doubled the number of chapters in the original volume to present a more comprehensive overview of the current breadth and depth of the field with applicability to an international audience. Readers are provided with the latest information and resource and reference material from authors who are noted experts in their field. The book emphasizes the importance of developing a collaborative culture of care within an animal care and use program and provides information about how behavioral management through animal training can play an integral role in a veterinary health program. Provides a new section on environment and housing containing chapters that focus on management considerations of housing and enrichment. Delineated by species, expands coverage of regulatory oversight and compliance assessment and assurance issues and processes, including a greater discussion of globalization and harmonizing cultural and regulatory issues.

includes more in depth treatment throughout the book of critical topics in program management physical plant animal health and husbandry biomedical research using animals requires administrators and managers who are knowledgeable and highly skilled they must adapt to the complexity of rapidly changing technologies balance research goals with a thorough understanding of regulatory requirements and guidelines and know how to work with a multi generational multi cultural workforce this book is the ideal resource for these professionals it also serves as an indispensable resource text for certification exams and credentialing boards for a multitude of professional societies co publishers on the second edition are aclam american college of laboratory animal medicine eclam european college of laboratory animal medicine iacclam international colleges of laboratory animal medicine jclam japanese college of laboratory animal medicine kclam korean college of laboratory animal medicine calas canadian association of laboratory animal medicine lama laboratory animal management association and iat institute of animal technology

a single source reference with a broad and holistic overview of nonclinical studies this book offers critical training material and describes regulations of nonclinical testing through guidelines models case studies practical examples and worldwide perspectives the book provides a complete overview of nonclinical study organization conduct and reporting and describes the roles and responsibilities of a study director to manage an effective study covers regulatory and scientific concepts including international testing and good laboratory practice glp compliance with guidelines and animal models features a concluding chapter that compiles case studies lessons learned from those that have served as a study director for many years addresses the entire spectrum of nonclinical testing making it applicable to those in the government laboratories and those actively involved in in all sectors of industry
